

PUREX

Replacement DE Filter Grids

OnCore replacement PUREX DE Filter Grids are designed for high-efficiency filtration performance, durability, and long service life. Featuring high-quality polyester media, reinforced frame construction, and chemically resistant components, these grids provide reliable operation and efficient debris removal for pool and spa filtration systems.

Engineered with reinforced 6-inch sectional support spacing to improve overall grid rigidity and stability during operation and servicing.

This staged approach delivers:

- Reduces flexing and distortion
- Easy cleaning and maintenance
- Enhances long-term structural integrity

SPUNBONDED POLYESTER FILTER MEDIA

- High-strength polyester
- Chemical-resistant synthetic fiber

REINFORCED CONNECTOR

- Increases durability under pressure and repeated handling

CHEMICALLY RESISTANT THREAD

- Designed to withstand harsh pool and spa chemicals.

ULTRA STRONG SEAMS

- Improves durability under pressure and handling

Our PUREX DE filter grids are constructed from high-strength spunbonded polyester media engineered for durability, chemical resistance, and long service life. Designed to support an even coating of DE powder, the media delivers effective filtration and enhanced debris capture. Resistant to tearing, stretching, and harsh pool chemicals, it maintains excellent water flow while trapping fine particles for cleaner water.
